DELPHINIUMS.

KELWAY'S WHITE DELPHINIUMS.

A NEW RACE

These charming Novelties originated with us. They are genuine and absolutely unique acquisitions to the border. White or clear cream or primrose tints have been previously unknown except in certain small-flowered species, to which **KELWAY'S WHITE DELPHINIUMS** bear no resemblance whatever. The form of spike is exactly similar to that prevailing in the best of our blue varieties *i.e.*, massively cylindrical, and branched below the central column. The lovely coloured picture which appeared in *The Garden*, of October 31st, 1896, where a spike of the **Beauty of Langport** was figured in contrast with one of our bright blue varieties **(True Blue)**—both spikes necessarily reduced in length by the artist—will be remembered by all who saw it.

BEAUTY OF LANGPORT, clear creamy white, with a yellow eye; slightly semi-double, 3/4 each. AWARD OF MERIT, Royal Horticultural Society, June 11th, 1895.

Beauty of Langport.—This variety is a distinct break in a family where blue is quite the predominant hue. Its flowers are creamy white, the petals prettily tipped with pale sulphur-yellow.—*The Garden.*

PART 3. continued—HALF-HARDY & GREENHOUSE PERENNIALS.

SINGLE DAHLIAS.

SERRATIPETALA (*Kelway's*), 8/- per doz. Glowing scarlet, the colour of a soldier's tunic; the bright gold-braid colour of the stamens completes the simile. The shape of this variety is absolutely unique amongst Dahlias. The petals, instead of being flat, are as it were, pleated, with the edges divided into points, generally two and sometimes three points to a petal, giving a fish-tail or scalloped appearance. It is of remarkably free habit, and the petals of the cut flowers *never drop*, which is the well-known drawback with the ordinary Single Dahlia. This makes it of great value for cut bloom and room and table decoration. This variety has the characteristic of producing a quantity of buds low down on the outside of the plant, which being protected from the early Autumn frosts, are in flower quite a month after many Dahlias have ceased blooming.
